About Me

Second-year Computer Science Engineering student with hands-on experience in full-stack development, computer vision, and cloud fundamentals. Enjoys building practical, real-world applications and working on problems that create measurable impact. Has experience leading technical teams, organizing hackathons, and delivering scalable solutions. Actively seeking internship opportunities to learn, contribute, and grow as a software engineer.

Education

SRM Institute Of Science And Technology

Sept 2024 – Present

B.Tech in Computer Science

- GPA: 9.44 / 10
- Coursework: Operating Systems, Data Structures and Algorithms, Object Oriented Programming, Advanced Programming Practices

Experience

Domain Lead — HackerRank Campus Crew (HRCC)

May 2025 – Present

- Led technical planning and execution for a **50+ member student community**.
- Set up the technical domain from scratch, including development of the official club website and internal structure.
- Contributed to launching **India's first HackerRank Student Chapter**, enabling regular coding practice and contests.

Technical Associate — 10x by Coding Ninjas SRM

Nov 2024 – Present

- Helped organize and execute a large-scale hackathon, managing planning, technical setup, and live execution.
- Coordinated a **10+ member core team**, ensuring smooth collaboration across development, design, and operations.
- Designed and developed the club and event websites collaboratively to support registrations and participant communication.

Full Stack Developer — ThousandX.in

June 2023 – Aug 2023

- Built responsive user interfaces using React, improving cross-device compatibility and increasing mobile engagement by **30%**.
- Developed and optimized backend workflows using MongoDB, enabling real-time updates and reducing page reloads by **40%**.
- Contributed to dashboards and learning modules, improving usability and reducing support-related queries by **25%**.

Projects

Mindful Work Desk (WorkOBalance) — GitHub

- Developed a Python-based desktop application focused on posture monitoring and workplace wellness using real-time computer vision.
- Implemented posture analysis using OpenCV and MediaPipe to calculate posture scores (**0–100**) based on neck and shoulder alignment.
- Built a gamification system with **10+ achievements**, streak tracking, and reward points to encourage healthy habits.
- Designed an analytics dashboard to visualize posture trends, session performance, and progress over time.
- Integrated MongoDB to store **1000+ posture records per session**, along with automated alerts and break reminders.

SRM EEE Virtual Lab — Live Demo

- Developed a web-based virtual laboratory featuring **4 Power System Analysis experiments** for EEE students.
- Implemented interactive simulations, theory sections, and self-assessment quizzes to support hands-on learning.
- Built a fully responsive interface ensuring smooth usage across desktop and mobile devices.

Technical Skills

Languages	Java, JavaScript
Front End	HTML, CSS, Tailwind CSS, React.js
Back End	Node.js, Express.js, MongoDB
Cloud & DevOps	AWS (Basics), Vercel
Tools	Git, GitHub, VS Code, Postman, Thunder Client
